

Kalyn Siebert Introduces VersaDECK Trailer

Gatesville, TX – (January 24, 2019) – Premium heavy-duty trailer manufacturer Kalyn Siebert has announced production of the new VersaDECK trailer for oilfield and other industry applications.

The VersaDECK is a 40-ton, 2-axle, 48' step-deck trailer designed for hauling any brand sandbox (Arrows Up, PropX, Sandbox and others based on their design) around oilfield locations. Like the VersaMAXX and VersaMAXX-EXT, the VersaDECK is designed for the greatest versatility. It can be configured for general freight, cargo, oilfield pipe and other applications.

All Kalyn Siebert trailers, including the VersaDECK, are engineered to deliver maximum strength at low tare weights, low maintenance costs, long service life and a high return on investment. The field-tested trailer is structurally designed to withstand years of off-road drill site usage without sacrificing tare weight.

“We are excited to introduce the VersaDECK trailer and further strengthen our portfolio of oilfield equipment,” said Jake Radish, Kalyn Siebert President. “The VersaDECK exemplifies our continued focus on designing products around our customers’ needs that deliver the greatest versatility.”
